Prathamesh Tambe

Boston MA | 857-317-0754 | <u>tambe.p@northeastern.edu</u> | <u>https://prathameshtambe.dev</u> <u>https://www.linkedin.com/in/prathamesh-tambe/</u> | <u>https://github.com/prathamesh-tambe</u> | Open to relocation

Education:

Master of Science in Information Systems, **Northeastern University, Boston, USA**Bachelor of Engineering in Information Technology, **Mumbai University, Mumbai, MH, India**June 2012

Technical Skills:

Programming Languages: PHP, SQL, Shell scripting

Web Development Frameworks: Angular, AngularJS, Chai (testing framework), Mocha (testing framework)

Databases: MySQL, MongoDB, MS SQL, DynamoDB, SQLite

Web Technologies: Drupal 7, Node.js, JavaScript, Typescript, NPM, HTML5, CSS3, Bootstrap, Redis caching,

Next.js, D3.js, Webpack, React.js, Handlebar.js, GSAP, TweenMax.js

Cloud Technologies: AWS:EC2, IAM, CloudFormation, VPC, SNS, SES, Lambda, Route53, RDS, AWS CLI

Technical Tools: Selenium, Micro focus UFT, GitHub, Bitbucket, SVN, Chrome Extensions

Professional Experience:

Upped Events, Philadelphia, USA - Fullstack developer

Oct 2020 - Present

- Building website using JavaScript, React.js, HTML, SCSS and, Bootstrap
- Maintaining backend portal using Node.js, express, AWS and MySQL
- Building new and fixing old functionalities in Ionic 4 app using Angular, TypeScript, HTML, and CSS

Airtank, New Hampshire, USA - Frontend developer

June 2020 - Oct 2020

- Built custom pages in ZiftrShop Framework using JavaScript, React.js, HTML, SCSS and, Bootstrap
- Performed code reviews on other developer's code and made sure coding standards followed

MathWorks, Natick, USA - Web development Intern

May 2019 - Dec 2019

- Implemented architecture and design along with the coding of the company's next-generation Log processing
 platform with object-oriented principles; backed by PHP, Angular, and SQL
- Created multiple sets of visualization reports in dashboard using D3.js on the data processed from the Log processing platform
- Built Bar graph, Line charts, Area graph and stacked area graphs with time line under it, which used to show 5 years of data
- Implemented file based cache to using dynamic json creation to avoid data processing for similar kind of requests for data visualizations, which improved graphs rendering by 90% for similar requests and reduces data processing by same amount

Cinestaan Digital pvt ltd, Mumbai, India - Web Developer (Fullstack)

Jan 2018 - Aug 2018

- Designed, developed, and deployed web application to create face match application which creates image collage by matching scores from REST API of IOT team where they found scores of face matching
- Developed database architecture in MySQL database for the User login mechanism to hold all the social and manual login, i.e. email and password
- Worked of OpenID SSO implementation to login to all the internal applications

Experience Commerce India pvt ltd, Mumbai, India - Senior Digital Technologist (Fullstack)

June 2014 - Sept 2017

- Created product websites for a couple of fortune 500 companies' using Drupal 7, PHP, jQuery, MySQL
- Persuaded hybrid mobile applications for iOS and android platform with a single codebase using lonic
 Framework, Angular, AngularJS, Typescript, SQLite, Drupal 7, and Node.js (For API and backend)
- Migrated 100000+ news content from Drupal 6 to Drupal 7 and maintained all the redirections
- Performed regular security updates on websites using Drush command-line shell
- Built custom themes and modules for modularized functionalities in Drupal 7
- Improved performance of Drupal 7 website by 60% by implementing key-value pair Redis caching
- Won a couple of awards for working on complete software life cycle (SDLC)
- Built secure api access by implementing JWT access token mechanism in NodeJS backend
- Migrated and re-engineered website from expression engine framework to Drupal 7 which improved the performance of the website by 70%
- Incorporated circular and bar charts of D3 visualizations to show daily user activity in node.js dashboard

- Revamped existing website using OOP concepts using PHP and created custom content management system
- Constructed websites that are **mobile-responsive** using CSS3, HTML5, and Bootstrap
- Implemented **Search Engine Optimization (SEO)** to get them high in search engines like google, yahoo on the list of keywords and
- Worked on custom content management system using PHP, MySQL, JavaScript, jQuery, HTML and CSS

Office efficiencies India Pvt Itd, Mumbai, India - Web Developer (Fullstack)

Oct 2012 - June 2013

- Upgraded current website using **Drupal 7** and created custom modules for functionalities
- Achieved chrome and Firefox browser extension development for category assignment tool
- Boosted SEO ranking of a website on 1st page using google analytics and webmaster tools
- Built dynamic data sorting log processing from DNS logs at runtime using MySQL, and Stored procedures
- Created category assign tool add-ons/extensions for Chrome and Firefox using JavaScript, XUL, HTML, CSS

Projects: May 2019 - Aug 2019

Network Structure and Cloud Computing (Circle Ci, Autoscaling, RDS, Code Deploy, Node.js, MySQL, Chai, Mocha, Git)

- Implemented Node.js Security Enabled web app interacting with multiple AWS services like RDS, SNS, IAM, S3 running on Load Balancer, Auto-Scaling EC2 instances with application logging on CloudWatch
- Achieved Continuous Integration with Circle CI and AWS Code Deploy
- Automated shell scripts to create and teardown CloudFormation stack resources like VPC, Internet gateways, Route tables, Subnets, **EC2** instances, and **RDS**
- Engineered password reset functionality with email notification using AWS Lambda, SES, SNS, and DynamoDB
- Maintained code standards and quality by implementing unit and integration testing using Chai and Mocha frameworks for Node.js
